Treaty with <i>Holland</i> Proclaim'd, <i>February 28.</i>	1

Of the Eclipses this Year 1675.

THere will be five Eclipses this Year, whereof, two will be of the Sun, and three of the Moon: of which only two of the Moon will be Conspicuous to us in *England*.

The first visible Eccclipse of the Moon, will be upon *New-Years Day*. *Jan. 1*, about 8, of the Clock at night,

The { Beginning } will be at { 5 h. 34 m. } at night.
 { Middle }
 { End } { 7 30 }
 { 9 24 }

The Digits Eclipsed, will be 18, and the Continuance 3. h. and 50 min. A Total Eccclipse, and worth observing.

The second visible Eclipse of the Moon, will be upon the 27th. of *June*, about half an h. after 3. in the morning.

The { Beginning } will be at { 1 h. 37 m. } in the m.
 { Middle }
 { End } { 3 30 }
 { 5 24 }

The Eclipse will be Total, for some time, the Digits Eclipsed being 15. and the whole Duration of the Eccclipse, will be 3. h. 47. m.. The beginning, and middle of this Eccclipse, may be seen, but the end cannot for the Sun (before that time) will be above our Horizon.

One Eclipse of the Sun will be *June 13* at 6 in the morn.

The other of the Sun, upon the 6 of *December* at 4 afternoon.

The third of the Moon, *December 22* about 3 in the morning, a very small Eccclipse, and very hardly to be discovered.

The Dominion of the Moon, over the parts of Mans Body, as &c.

January hath xxxi. Days.

- Full Moon the 1st. day, 22. min. after 7. at night.
 ● Last Quarter the 8th. day, 23. min. after 6. at night.
 ● New Moon the 15th. day, 36. min. after 9. at night.
 ● First Quarter the 23th. day, 26. min. after mid-night.
 ● Full Moon the 31st. day, at 9. of the Clock in the fore-noon.

The foregoing ALMANACK Explain'd.

IN each Month are contained Six Columns, in the first whereof is the day of the Month. — In the second the day of the Week, **C** being Sunday Letter. — In the third you have the Feasts, both Fixed and Moveable, as also the time of the Sun Rising, and Setting, and the length of the Day. — In the fourth you have the sign and degree in which the Moon is every day at Noon. — In the fifth, you have the time that it will be High-water at London-Bridge every day. — And in the last you have the Aspects of the Planets one among another: The Inclination of the Air: The Meeting of the Planets and Seven Stars with the Moon, and the time of the Moons Rising, Southing, and Setting.

Of the Four Seasons or Quarters of the Year.

Of the Spring.

THE Spring begins at the Suns entrance into Aries, making the Days and Nights of equal length, which will be this Year March 10. at 49 min. past 9 in the morning. The proper Nature of this Season is hot and moist.

Of Summer.

Summer begins when the Sun enters Cancer, making to us the Longest Days, and Shortest Nights, and will begin this Year the 11 of June 24 min. after High-noon. The Nature of this Season is hot and dry.

Of Autumn.

Autumn begins at the Suns entrance into Libra, making (again) the Day and Night of equal length, and it will begin this year, the 13 of September, at 17 min. after 4 in the morning. The Nature of this Quarter is cold and dry.

Of Winter.

Winter begins at the Suns entrance into Capricorn, making the Shortest Day, and Longest Night, and this Year it will Commence upon the 11 of December, 4 min. before 10 in the Forenoon. This Quarter is Naturally cold and moist,

This Table shews the Interest of any sum of Money from 1 s. to a 100 l. from a day to a year. And by the help of Addition you may compute the Interest of any sum whatsoever, and note that for the greater exactness the penny is divided into a 100 parts, so that 25 parts are a farthing, and 50 parts an half-penny, and 75 parts 3 farthings, &c. *Example.*

The Interest of 100 l. for 6 months one week and one day, is thus found by the Table.

The Use of the foregoing Table.

THe Use of this Table is threefold: For,

1. The price of the pound being known, you may find the price of the great hundred, or a hundred and twelve pound.

2. The price of the hundred being known, you may know what one pound thereof is worth.

3. If your hundred weight cost you any sum of money, you may know at what rate to retail (or sell) the pound, to gain so much as you desire upon the price of the hundred for laying out your money.

Examples of all these.

1. At 4d. 3q. the pound, what will the hundred come to?

Look in the first Column for 4d. 3q. and right against it towards the right hand, you shall find, 2l. 4s. 4d. and so much will the great hundred of one hundred and twelve pound come to. — And at 9d. 1q. the pound, the 100 weight will come to 4l. 6s. 4d.

2. If I give 7l. 4s. 8d. for an hundred weight of any Commodity, what doth that stand me in the pound?

Look for 7l. 4s. 8d. and Right against it (towards the left hand) you shall find 15d. 2q. and so much doth one pound cost. In like manner, if the hundred weight do cost 10l. 7s. 8d. the pound will be found to cost 22d. 1q.

3. If I give 8l. 10s. 4d. for an hundred weight of any Commodity, what must I retail it at the pound, so that I may get 40s. by laying out my money.

The Price being 8l. 10s. 4d. add thereto 40s. which you would gain, and it makes the sum 10l. 10s. 4d. Seek therefore in the Table for 10l. 10s. 4d. or the nearest Sum thereunto you can find, which you will find to be 10l. 10s. against which there stands 22d. 2q. so that you must sell your Commodity at 15. 10d. 2q. the pound, and in so doing you shall gain 40s. (wanting 4d.) for laying out of your 10l. 10s. 4d.

In like manner, if the Hundred Weight cost you 3l. 14s. 8d. and you would gain 25s. in the hundred, you shall find that you must retail your Commodity at almost 10d. 3q. the Pound. And the like of any other.

Note that if your Commodity come to above 2s. the Pound, you may then take half of the price, and afterwards double it. — Or you may deal first with the shillings, and afterwards with the rest of the Price.

A Catalogue of all the Marts

or Fairs in *England and Wales*, with the Days on which they are kept; Alphabetically disposed for the more ready finding of them, by knowing the Name of the City or Town.
